Solving Quadratic Equations Part II   Name _____

1d
Solve by using the formula.
$x^2 + 6x + 8 = 0$
Solutions: x = _____ and x = _____

2d
Solve by using the formula.
$x^2 + 10x + 21 = 0$
Solutions: x = _____ and x = _____

3d
Solve by using the formula.
$x^2 - 8x + 7 = 0$
Solutions: x = _____ and x = _____

4d
Solve by using the formula.
$x^2 + 4x - 5 = 0$
Solutions: x = _____ and x = _____

5d
Solve by using the formula.
$x^2 - 14x + 48 = 0$
Solutions: x = _____ and x = _____

6d
Solve by using the formula.
$x^2 - 8x + 12 = 0$
Solutions: x = _____ and x = _____
